What is a Beam Central Vacuum System?

Simply put, it's the modern, healthy way to vacuum your home!

The system consists of four main elements:

A Vacuum Power Unit

Typically located in the utility room, garage or basement.

Concealed 50mm ducting network

Installed throughout the property within the walls/floors, connecting a series of centrally placed vacuum inlets.

A vacuum cleaning hose

Lightweight and crushproof, with a set of cleaning tools & accessories for cleaning carpet, hardfloors and upholstery.

Kitchen Vacpan

A standard feature of every Beam Central Vacuum System! Daily cleaning convenience for the kitchen.

Benefits of a Beam Central Vacuum System

Vacuum faster, easier, and more efficiently than ever before – the ultimate in built-in convenience.

Clinically Proven Health Benefits

- 1.** Provides measurable relief for asthma & allergy sufferers as all dust, mites, pollen and other allergens are removed out of the living areas, leaving the air you breathe free from harmful irritants.

Power on Demand

- 2.** No loss of power or re-charging is needed. Simply start the system by the control switch on the hose handle.

Superior Performance

- 3.** Industrial strength suction – up to 50% more powerful than a portable vacuum.

Benefits of a Beam Central Vacuum System

Quiet Vacuuming

4. As the power unit is typically located in the utility or garage area, there's no noisy vacuum motor to pull around at the point cleaning.

VacPan for Everyday Cleaning

5. Just sweep the debris to the kitchen VacPan, activate with your toe, and the dirt is whisked away – perfect for daily use.

Product Range

Get in touch to find which system is suitable for your home.

Beam Alliance Range

The Alliance range combines ultimate cleaning performance with Smart Screen technology, providing complete system monitoring.

- Smart screen technology
- 3-in-1 Cleaning Tool
- Unique press & release bin

Beam Serenity Range

The Serenity range of vacuum units provide powerful and quiet cleaning performance.

- Interactive Digital LCD Screen
- Efficient Bypass Motor
- Self-Cleaning Filter

Beam Mundo

Our economy Beam Mundo vacuum unit features strong motor performance with high suction power.

- Ideal for smaller houses
- Compact & Robust
- Performance & Value

All New! Beam Retractable Hose Management System

An alternative option to the 9m cleaning hose, this retractable central vacuum hose is stored within the wall and pulled out from the wall inlet for use.

- Quick & simple to use
- No storage space needed for your hose
- A hose behind every wall inlet
- Retracts within seconds

It's important that this system is planned early during the build stage.

How It Works

1. Simply pull out the length of vacuum hose required
2. Connect the cleaning attachment of your choice to the hose
3. Pull the black handle to lock the hose and start vacuuming
4. When finished, push the black handle in and the hose will retract inside the ducting system behind the wall inlet.

Installation of a Beam Central Vacuum System

You can install the system yourself, or an experienced Beam engineer will be happy to install the system for you.

Plan Ahead

We advise getting in touch as early as possible so that our experts can guide you on the best locations for both your central vacuum unit and wall inlets.

Installation - home under construction

Split into 2 stages:

- First Fix - Before plastering, central vacuum points will be fitted within the walls.
- Second Fix - When plastering is nearing completion but the floors are not yet poured, the central vacuum ducting is installed.

Installation - existing property/renovation

Most existing properties can be fitted with a central vacuum. A survey is recommended to determine the best way to retrofit the system.

What our customers think...

75,000+ customers across the UK & Ireland trust BEAM. But don't just take our word for it...

Mr & Mrs McMullan

"I use our Beam vacuum everywhere you can think of, it comes with handy tools for all surfaces. If we ever build again, I'd have another Beam in a heartbeat!"

[Read more >](#)

Mrs Speers

"It's so easy to use. And even better – we never need to worry about battery life. Plus, there is no dusty or dirty air to breathe, which is great for Alex who suffers from asthma."

[Read More >](#)

Mrs McCaughan

"I've had many portable vacuums in the past and the suction of this vacuum is outstanding in comparison! With no need to recharge and no loss of suction, I couldn't recommend it enough."

[Read more >](#)

Mr & Mrs Grant

“The Beam vacuum is brilliant. I can’t believe how easy it is to just pull the hose out of the wall, attach the handle, and vacuum all the rooms so quickly.”

[Read more >](#)

Mrs Wright

“The vacuum inlets are conveniently placed, and suction is unreal, removing all the dust and dirt through the concealed ducting into the bin in the power unit.”

[Read More >](#)

Mrs Stewart

“The VACPAN is genius. In essence, it is a slot installed in the kickboard. A quick brush, a flick of a switch, and the dirt is sucked away.”

[Read More >](#)

Mrs McGahey

“The hose is lightweight and long enough to go from room to room. We have a handheld vac too and there’s no way I’d do the whole house with it, it doesn’t compare at all.”
